ART & DESIGN PRACTICE BA (HONS) FINAL YEAR & FOUNDATION DEGREE

This exciting art and design degree at Cornwall College is available both full- and part-time and brings together our higher education expertise in fine art, ceramics, print making, painting, fine art textiles, graphic design, surface design, illustration, photography and 3D design, into a unique and vibrant interdisciplinary course.

Today's artists and designers have to be adaptable individuals, constantly moving between different methods of work. Our course aims to provide an invigorating blend of traditional, contemporary and innovative approaches to learning, and is unique to Cornwall and the South West.

The highly qualified lecturing staff are all practising specialists within their own fields of art and design. We operate industry-standard workshops using the latest equipment and expertise.

Our interdisciplinary approach allows you to keep an open mind about materials and methods, and to develop your own specialised skills within specific art and design specialisms, creating a unique approach to your own practice.

As a student on the course you will have the opportunity to gain experience in collaboration, communication, creative enterprise, design, digital media, image making, installation, animation, materials innovation, textiles, ceramics, metals, new technologies, furniture making, model-making, mark making, plastics, print, professional practice, public art, and film.

To enrich the studio experience and enable you to develop the necessary skills and expertise for a successful future, the programme also includes critical studies, enterprise studies, professional practice, and computer applications. Graduates from this course are self-motivated, questioning and knowledgeable; able to see themselves as a positive agent of change in the current art and design landscape. Therefore there are many avenues of employment to pursue, including work in a design studio or you may wish to set up your own art and design practice. Further academic study includes a variety of art and design teaching qualifications or postgraduate study at MA level.

PHOTOGRAPHY FOUNDATION DEGREE

Our exciting and vibrant new FdA Photography programme is built upon the years of existing good practice to be found in the Arts and Media Department at Cornwall College Camborne.

Photography is a popular, challenging and competitive subject. As such our new programme has been designed to ensure our graduates are tenacious, flexible and excited by the new opportunities that are available in photography and are fully aware of the niches that can be carved within the creative industries.

ARTISTIC LICENSE

GAME CHANGER

The UK's digital industry is growing 32% faster than the rest of the economy, according to an industry leading report. To supply a talented workforce, we've developed some applied degree programmes to get you working in this creative and amazingly rewarding sector, whether that's games design, film making or digital media in general.

Game on...

So you want to work in games design? We can help you get started.

We are proud to be able to deliver the Games Design for Industry BA (Hons) top-up degree programme in partnership with Falmouth University. You can also study a University of Plymouth Higher National Diploma over two years with us. Both routes offer a practical applied approach, working on real products, developing your own ideas and getting some great input from local industry as well as residential trips to larger organisations around the UK to widen your experience.

You will gain an understanding of the broad areas of games development, Ludology, concept artwork, 3D modelling and animation, level design, history, coding and virtual reality before specialising in a specific role. You will learn technical and creative aspects of the games design pipeline and have access to the latest hardware and software such as Oculus Rifts And Vives.

Career Fact File

Computer Games Developer

Av. starter salary: £19,000 to £25,000 (rising up to £50,000+ for highly experienced)

Entry requirements to the sector: You'll usually need an HND, foundation degree or degree in computer games technology, computer games development or multimedia design. A degree with a work placement could give you an advantage.

Employed in this sector: 5,473

Recruited direct from education: 48%

Freelancers: 14%

Workforce qualifications: 42% have an undergraduate degree.

Degree programmes available in this area:

- HND Games Design for Industry
- BA (Hons) Games Design for Industry (top-up degree)

ALUMNI SUCCESS

After graduating with a first class degree from the BA (Hons) Games Design for Industry (Final Year Level 6), Angela is currently in the process of setting up her own business, while studying for a Master's in Creative App Development at Falmouth University.

"When I found out that there was a dedicated games design degree course I couldn't believe it, it was perfect for me and being run in Cornwall was even better as I didn't have to move away. I am looking at establishing a new business on the campus that is run by graduates for graduates. This will give graduates the opportunity to have a job at the end of their degree course, where they can develop their skills and experience working on real commercial projects."

Angela Hosking
Student of the Year 2017

BUILDING A BETTER FUTURE...

Degree programmes available in this area:

- HNC Construction & the Built Environment

For more information
search #construction2021
at www.cornwall.ac.uk

There are many pathways that can lead to a career in the construction industry that do not require years of extensive study.

Working in sustainable construction, buildingsurveying, buildingcontrol, quantity surveying, civil engineering, structural engineering or construction management; or if you would like to be involved with the design, production or management of structured buildings. These are all possible

with undergraduate qualifications, some postgraduate specialisation in some areas and work experience.

There's also the opportunity to study a degree part-time alongside working in the building sector as a career development opportunity. Useful resources if you are considering a career in this sector are: www.goconstruct.org and www.citb.co.uk

Career in focus:

Civil Engineer

Entry requirements: HNC or FdSc in Civil Engineering or Construction & the Built Environment.

Salary range: £14,000 to £45,000

Skills strengths you will need: strong maths and science, problem-solving, IT and good communication skills.

ENGINEERED FOR LIFE...

There are four main disciplines in engineering that you could follow: mechanical, chemical, civil or electrical. Within those there are literally hundreds of career options. The sector pays well and allows a lot of creative possibilities for someone who is also strong in problem solving and maths.

Key facts:

- Engineering companies are projected to need 1.8 million people with engineering skills each year to 2025.
- The average graduate starting salary for engineering and technology is £27,079 – more than 20% higher than the average for all graduates.

Possible careers:

Electrical engineer
Civil engineer
Marine engineer
Mechanical engineer
Manufacturing engineer
Design engineer
Automotive engineer
Aerospace engineer
Agricultural engineer

See www.plotr.com for more insight into these great careers.

Degree programmes available in this area:

- HNC Engineering
- FdSc Engineering

A LIFE ON - THE OCEAN - WAVES

ALUMNI SUCCESS

Matt Dykes is Bosun on board a 75m motor yacht, with worldwide cruising capability. He has successfully completed his FdSc Operational Yacht Science and is aiming to complete his Officer of the Watch 3000 gt this year.

SAIL THE WORLD WITH OUR SUPERYACHT PROGRAMMES

The superyacht industry requires crew who can work across an enormous range of specialisms; our programmes focus on helping you start your career as either an engineer or as a bosun or deckhand. Run in partnership with the UKSA in Cowes, successful completion of either one of our HNC programmes, will give you direct entry on to the foundation degree.

PROFESSIONAL SUPERYACHT ENGINEER HNC*

As an engineer you will need to be able to fix and maintain the superyacht while out at sea. This can include anything from being in the engine room dealing with advanced diesel engines, jet drives and propulsion systems, to generators, hydraulics, water makers and refrigeration. Working on the interior's audio visual, lighting and communications, as well as vacuum flush toilets and plumbing. Or being on the bridge and dealing with the electronic navigations systems and computer driven systems.

OPERATIONAL YACHT SCIENCE HNC

If you would like to help maintain the exterior of the yacht, which includes organising all the deck operations, then this course is ideal for you. You will learn yacht operations, yacht theory and practice, navigation and meteorology and will spend time on board superyachts between study periods where you could earn on average €2000 per month (deckhand).

*Subject to approval by the University of Plymouth

Degree programmes available in this area:

WE MEAN BUSINESS...

Business degrees are a key part of UK universities with business undergraduate and postgraduate study and research forming a central part of their portfolio.

Our top-up degree, which is delivered through Cornwall Business School, is applied, which means you often work on live projects with national and local enterprises and see the rewards of your work in action in real time.

You learn from a diverse pool of entrepreneurs, with the region fast becoming a hotbed of booming business thanks to superfast broadband.

We've been getting it right for over 20 years, offering our business degree in partnership with the University of Plymouth.

BA (Hons) Business Enterprise (top-up degree)

Duration: one year full-time

Entry requirements: 240 credits with 120 at Level 5 from a relevant Foundation Degree, HND, or equivalent in an appropriate subject.

This Level 6 top-up degree brings business studies right up to date by preparing the managers and directors of tomorrow with insight into enterprise, ethics, governance, human resources, marketing and performance management.

Degree programme available in this area:

- BA (Hons) Business Enterprise (top-up degree)

For more information search #business2021 at www.cornwall.ac.uk

WE KNOW IT SO WELL, WE'VE WRITTEN A BOOK ON IT.

Senior business lecturer Dr Bryan Mills has published a technical reference book for economist and business students. The publication, *Financial Management Made Manageable*, is available via online book sellers and is aimed at assisting both undergraduate and postgraduate students. It took 12 months to write, and offers academic students an easy to navigate reference book looking at calculations from first principles, quickly moving to application.

"Having taught business and finance at such a high level and over many years, I began to see that students were expected to know lots of complicated equations and know how to apply them, and in reality few people can actually recall these methods," Dr Mills said.

"So I began to experiment with focusing on shorter and more concise calculations which proved very popular with the students and this led to me writing a concise easy to read guide for all abilities."

DR BRYAN MILLS
Team Lead for Business

Bryan Mills is a highly experienced business lecturer with experience across disciplines and industries.

He has experience in working with universities, the World Bank, companies and government and was originally involved in construction and still maintains a business interest in that area.

As a senior fellow of the Higher Education Academy, he holds an ACCA post-grad diploma in Financial Management, a PhD in Economics and a degree in business as well as a PGCE.

There are now
1.64 million
digital tech
jobs in the
UK, and the
digital sector
is creating jobs
2X faster than
the non digital
sector.

Careers fact file:

- Average advertised digital tech salary is £50,663, 44% higher than non digital.
- Data-centric roles offer some of the highest salaries in the sector, with information security roles following close behind.

I AM DIGITAL

**A DEGREE
FOR THE
AGES...**

LEARN HIGH LEVEL SKILLS THROUGH TEAMWORK AND REAL PROJECTS.

The Tech Nation 2019 report identified that the UK is the digital capital of Europe - a clear leader when it comes to tech investment, digital skills and collaboration within ecosystems. It's never been a better time to train in the digital tech sector, and what better location than beautiful Cornwall which, thanks to superfast broadband, is one of the fastest growth areas for tech businesses in the UK!

In 2019 UK digital tech investment reached a record high of £10.1 billion.

The UK is 3rd in the world for tech unicorns behind only the US and China, with 77 companies valued at over \$1bn.

UK tech employment grew by 40% in the last two years, now accounting for 9% of the national workforce with 2.93m jobs created.

We've joined forces with Software Cornwall and leading Cornish tech company Headforwards to develop degree programme projects with real life clients and possibly local industry partners, developing a workforce for a booming Cornish digital economy and beyond.

Our two year foundation degree and one year BSc (Hons) Computing Technologies top-up degree will prepare you for a range of digital careers. Awarded in partnership with the University of Plymouth, this programme offers two strands, specialising in either networking technologies (we are a CISCO Networking Academy) or software development, with a focus on agile development methods and coding.

Degree programmes available in this area:

- FdSc Computing, Networking & Software Development
- BSc (Hons) Computing Technologies (top-up degree)

**TRAINING THE NEXT
GENERATION OF EMERGENCY
AND PROTECTIVE SERVICES**

LINE OF DUTY

EMERGENCY AND PROTECTIVE SERVICES

If you want a career that will make a real difference to people's lives then the emergency services sector is the perfect choice. In today's world our emergency services personnel are the true heroes of our country.

Running towards potentially dangerous situations when everyone else is running the other way takes real bravery. Our programmes will teach you the specialist skills you need to hit the ground running when you enter the industry.

The range of job opportunities in the emergency services is vast, from being a dog handler for the police to being a paramedic or working as a firefighter, according to Mike Rose, programme manager for the FdSc and the BSc (Hons) programmes at Bicton College.

"We only need to see the recurring news reports of terrorist atrocities and natural disasters to appreciate the very real need for these emergency sector courses, and the fantastic students of all ages that want to join the sector and make a positive impact

are learning from industry experts at Bicton," he explained.

"During your studies you will be taught a wide range of skills including firefighting, policing, rope and water rescue, how to prepare for and manage major emergencies and disasters and more.

"These students are all seeking a future career within the emergency and public sector so exposure to all these elements is fantastic experience and will help the students to make career and life decisions," Mike added. Our BSc (Hons) Emergency Sector Management & Interoperability programme focuses on the ability of the agencies within the emergency sector and military to operate in conjunction with each other. This programme provides an automatic progression route from our relevant foundation degrees. Students on this course will be studying counter-terrorism, interoperability, risks, threats, health & safety, and people and workforce management as well as completing industry focused dissertations.

Degree programmes available in this area:

- FdSc Rescue & Emergency Management
- BSc (Hons) Emergency Sector Management & Interoperability (top-up degree)

For more information search #emergency2021 at www.cornwall.ac.uk

If you care about the people who share your world, a career in health and social care may be for you.

YOUR FUTURE'S IN SAFE HANDS

Graduate career opportunities in this sector are more varied than you might think. You could choose to specialise in advice and guidance, child protection, counselling, fostering and adoption, housing and support, occupational therapy, social work, health promotion or youth and community work.

There's been a lot of research into employment challenges in the sector, with major employers being the NHS, local government and a growing private healthcare sector.

IN ENGLAND THERE ARE APPROXIMATELY 80,000 JOB VACANCIES AT ANY GIVEN TIME.

However after a recent dip in the number of people choosing to study at degree-level in this area, job opportunities for graduates may be on the rise.

Many of our undergraduates progress on to a variety of master's and postgraduate study, particularly to pursue careers in social work and post-16 further education teaching and training.

There are too many possible career routes you can access from our degrees to list, here is just a taste:

- Activities worker
- Care worker
- Rehabilitation worker
- Advocacy worker
- Team leader or manager
- Housing support officer

There is also a range of regulated professional roles you could move on to with further study:

- Social worker
- Occupational therapist
- Complementary therapist
- Counsellor

Degree programmes available in this area:

- Advanced Counselling Studies Certificate*
- Person-centred Counselling & Therapy Diploma
- Health, Welfare & Social Sciences HNC
- BA (Hons) Counselling Studies (top-up degree)
- BSc (Hons) Health, Welfare & Social Sciences
- BSc (Hons) Health, Welfare & Social Sciences (top-up degree)

See our section on education and teaching for degree opportunities in early years and childcare in particular.

*Subject to approval by the University of Plymouth

For more information search #care2021 at www.cornwall.ac.uk

“With increasing awareness of mental health in today’s society, there is a growing need for talking therapies. Our counselling programmes will help you build a fulfilling, long-term career, where it’s a privilege to work with others who put their whole trust in you.”

Debs Williams
Programme Manager
Counselling

Growing Talent

Imagine studying at the Eden Project, Cornwall's world famous visitor attraction. Situated on the outskirts of St Austell, this campus is the perfect home for our degrees in horticulture, garden and landscape design, and renewable energy technologies.

HORTICULTURE, GARDEN AND LANDSCAPE DESIGN

The Eden Project is a unique place to study. Together with experienced subject specialists and our campuses at Rosewarne and Bicton, students benefit from the extensive facilities and plant collection, both inside the iconic biomes and out. Embracing Eden's values throughout their studies, students are encouraged to research opportunities and solutions to benefit society and help it to meet the challenges of a changing global environment and the projected increase in population.

Employability is at the heart of what we do. There is a well-publicised need for graduates in this sector and our suite of courses will help you develop skills appropriate to a wide range of applied career options, both nationally and internationally. Our garden and landscape design programmes allow you to work on live projects with real life clients, gaining real world experience of this creative industry. Our plant science degree will help you build the foundations for numerous technical and managerial careers within crop production, estate and garden management, and garden conservation to name but a few.

In recent years students have won numerous awards for their work including the Prince of Wales Trophy for Sustainable Horticulture and The Society of Garden Designers Student of the Year Award, in 2014 and 2017.

ALUMNI SUCCESS

“Time spent with Duchy College was fantastic! I found both Duchy College Rosewarne & Eden inspirational places to be. I had made the decision to change career so was determined and excited to be focusing on something I really wanted to do.

I entered my final college project into the Society of Garden Design Awards and was delighted to win the best student award. The course helped me with a good start to a new career. I now run my own design practice, working on a few projects locally and further afield. I also do some freelance design work for other designers.”

Richard Riddell
Garden Designer

Degree programmes available in this area:

- HNC Garden & Landscape Design
- HND Garden & Landscape Design
- FdA Event Management see page 38 for more information
- FdSc Horticulture
- BSc (Hons) Horticulture (Garden & Landscape Design)
- BSc (Hons) Horticulture (Plant Science)

For more information search #horticulture2021 at www.cornwall.ac.uk

Reap what you sow

Climate change, water shortage, pressure on land-use and how to feed the ever increasing population, are just some of the challenges that face this diverse industry. If you want to make a difference and help tackle these issues then our range of programmes is for you.

ALUMNI SUCCESS

"On completion of the FdSc Agriculture I then continued my studies on to the BSc (Hons) Rural Business Management. I am now currently studying for a PGCE alongside my two job roles of training coordinator and shepherdess.

A highlight of the course was the dissertation, where we could relate our project to areas of interest, passion and business progressions. I completed my project on my home farm, which has formed an integral part of breeding decisions and replacement policies made on the sheep flock. It was brilliant having smaller classes because there was a good working relationship between students and staff, which allowed for excellent learning and knowledge transfer to occur. My number one advice is to take this course if you would like obtain a degree in a way in which you can receive lots of outside experience within the industry, while working at the same time."

Holly Yelland
Training Coordinator
Rural Business School

Both Bicton College and Duchy College Stoke Climsland are nestled deep in the countryside with 500 hectares between them: allowing you to completely immerse yourself in the environment. Whether you want to specialise in farming the land or conserving the countryside you will benefit from our specialist facilities, which include working farmland and a state-of-the-art dairy unit.

All of our courses benefit from close links with industry ensuring you gain all the relevant skills and experience you will need to go straight into employment on completion of your course.

Degree programmes available in this area:

- FdSc Agriculture
- FdSc Conservation & Countryside Management
- BSc (Hons) Agriculture
- BSc (Hons) Rural Business Management (top-up degree)
- MSc Land & Ecological Restoration

MALANI

Love animals? You can make a career out of studying them through a whole range of degrees...

We offer a multitude of programmes focused on the protection, care and conservation of our natural world and the animals that exist within it.

Zoology can be studied to honours level at our campus adjacent to Newquay Zoo where there is a wide range of species to study and learn from. Animal students at Bicton College have access to an extensive animal management centre on campus, which includes meerkats, coati, an exotics

room, a two-storey marmoset monkey enclosure and an aquarium, along with access to the resources at Dartmoor Zoo.

Wildlife Education and Media is a great programme for any budding Attenborough, learning about zoology, animal behaviour and conservation, alongside media creation and education theory, to be able to provide an amazing visitor experience programme.

Veterinary nursing takes place on our Rosewarne campus and provides an ideal graduate route into veterinary nursing and successful completion allows registration with the Royal College of Veterinary Surgeons as a Registered Veterinary Nurse (RVN). Work related learning is fully integrated with 1,800 hours of completed veterinary nursing work experience.

“The question is, are we happy to suppose that our grandchildren may never be able to see an elephant except in a picture book?”

David Attenborough, broadcaster.

Degree programmes available in this area:

- FdSc Animal Behaviour & Psychology
- FdSc Animal Health & Management
- FdSc Animal Husbandry & Welfare
- FdSc Veterinary Nursing
- BSc (Hons) Applied Animal Health (top-up degree)

For more information search #animal2021 at www.cornwall.ac.uk

- FdSc Conservation & Ecology
- FdSc Wildlife Education & Media
- FdSc Zoological Conservation
- BSc (Hons) Applied Zoology (top-up degree)
- BSc (Hons) Applied Zoology & Conservation
- BSc (Hons) Applied Zoology & Conservation (incl. sandwich year)

For more information search #nature2021 at www.cornwall.ac.uk

ALUMNI SUCCESS

“After studying the FdSc Wildlife Education & Media and the BSc (Hons) Applied Zoology course at Newquay I then started work as a runner for Silverback Films and eventually got a job as a story developer for Springwatch. I’ve worked on ‘The Watches’ for several years now and have led a variety of roles whilst on location. I haven’t looked back since my studies and as long as you have a passion for what you are studying, then you’ll do well for yourself.”

Lily Moffatt
Springwatch

HORSES *for* COURSES

If your career aspirations are focused around the equestrian industry, our inspiring range of equine degrees are designed to give you a wide range of knowledge and skills needed to become part of the industry you are passionate about.

The estimated overall economic value of the UK equine industry is 4.3 billion

There are an estimated 944,000 horses in Britain

Indirect consumer expenditure associated with equestrian activity is estimated at 560 million per year

Our degree programmes allow you to focus skill development around your interests, so whether you are looking for a career in equine management, training, behaviour or welfare, the choice is yours. We also actively encourage and support student research and publication in your chosen area of interest.

Immersing yourself in the equine world couldn't be easier at our Duchy College Stoke Climland campus. Located deep in the heart of the beautiful Cornish countryside, this campus houses quality equestrian facilities to enable development of your skills and confidence both practically and theoretically. The use of three separate yards, two indoor and one outdoor arenas, purpose built practical areas for demonstrations and practical learning, plus a vast array of practical equipment and specialist technology ensures you are provided with everything you need to succeed.

Duchy College also has the added advantage of regular visits and talks from farriers, vets, equine therapists, dentists and saddle fitters alongside a range of other industry professionals to add depth to your experience.

Degree programmes available in this area:

- FdSc Equitation, Training & Behaviour
- BSc (Hons) Applied Equitation Science (top-up degree)
- MSc Equitation Science

For more information search #animal2021 at www.cornwall.ac.uk

ALUMNI SUCCESS

"I progressed from Level 3 up through to MSc Equitation Science at Duchy College. When I first started I lacked confidence and Duchy College was able to offer small class sizes ensuring an inclusive environment.

I have always wanted to lecture and coach and Duchy College has put me on the pathway to achieving this dream. I have exceeded all personal expectations achieving an MSc in Equitation Science, which now supports my practice. Alongside my studies I worked within a variety of yards from event yards, riding schools and studs. The experience gained provided the skill set required for my BHS exams as I was able to compete up to FEI */ Novice/Intermediate and provide the care required for horses within these areas. This in itself has supported my business."

Bradley Moore-Taylor
Owner
Garlands Farm Equestrian

LET'S THINK DEEP

IF YOU ARE INSPIRED BY MARINE DOCUMENTARIES AND ARE CONSIDERING UNIVERSITY STUDY IN THE SCIENCES, TAKE A CLOSER LOOK AT OUR UNIQUE COLLECTION OF ALL THINGS MARINE...

Marine Conservation, Science and Zoology

We offer degrees in Marine Conservation, Marine Science and Applied Marine Zoology at our Cornwall College Newquay campus.

Less than a mile from the Gannel Estuary, a recently designated Marine Conservation Zone (MCZ) as a student with us you have access to some of the most amazing aquatic life. The MCZ is part of an international network to protect a high variety of habitats and species.

The habitats protected include exposed sandy beaches and rocky shores, home to important species such as the rare giant goby which is not well protected in existing marine protected areas in this region. The estuarine rocky habitats in the site are important for a range of plants and animals. On the shores of the estuary, rocks provide

a habitat for large seaweeds and sheltering barnacles, snails and shrimp-like animals. Within the estuary area, coastal saltmarsh also provides refuge and food for animals and plants.

There is a large element of work-related learning integrated within these degree

programmes and you will have the opportunity to talk to many experts in the field and visit professional institutions; we have strong links with commercial partners Blue Reef Aquarium, the National Lobster Hatchery and Cornwall Wildlife Trust.

Degree programmes available in this area:

- FdSc Marine Conservation
- FdSc Marine Science
- BSc (Hons) Applied Marine Zoology
- BSc (Hons) Applied Marine Zoology (top-up degree)

If you love the ocean, you may also be interested in:

- FdSc Surf Science & Technology
- BSc (Hons) Marine Sports Science
- BSc (Hons) Marine Sports Science (top-up degree)

For more information search #nature2021 at www.cornwall.ac.uk

ALUMNI SUCCESS

While many of us might think twice about plunging into the sea when we knew there were sharks beneath us, it is a dream come true for Lauren Pestana. Lauren was given the incredible opportunity to work alongside National Geographic and Discovery Channel experts in South Africa, researching sharks.

“I had the chance to do some great field work in some really scientifically interesting areas. I got to move to the other side of the country and meet new people who were interested in the same things as me. I love sharks, so to be given the support to carry out research was an excellent experience.”

Lauren Pestana
Internship with The Shark Project

“The important thing is to

**NEVER STOP
QUESTIONING.”**

ALBERT EINSTEIN

It is widely recognised that there is a shortage of STEM graduates across the UK – current figures estimate the shortfall to be 40,000 a year – but did you know that STEM graduates can earn nearly 20% more than their peers, at an average of £26,023. With the industry in need of graduates to fill these skills gaps, a degree in this sector is in high demand.

If you want a career that is innovative, challenging and exciting, and you want to make a real difference to the world, then a job in the science industry will take you on a path of exhilarating discovery. Jobs in this sector are all about trying new things, carrying out experiments, improving people's lives, and developing our knowledge and understanding of the world around us.

There are many jobs in the science sector which span a huge range of areas including those in the biology and chemistry industries, for example laboratory managers, quality control technicians, research assistants or analytical chemists.

Our two year FdSc programmes in either Bioscience or Chemical Science will help you develop a range of skills, techniques, personal qualities and attributes that are essential for successful progression to employment in these scientific industries. Both programmes have been designed in collaboration with employers in the UK STEM sector and are endorsed by the Society of Biology and the Royal Society of Chemistry.

This top-up degree is designed for people with a strong interest in the environment who would like to develop their scientific skills and knowledge base.

This programme will provide you with an insight into the business world and the practices of organisations involved in environmental work. Experienced, supportive and fully qualified academic staff will deliver the programme and will guide you throughout the course. You will also benefit from a geographic location that utilises a diverse range of terrestrial, fresh water and marine ecosystems.

Degree programmes available in this area:

- FdSc Bioscience
- FdSc Chemical Science
- BSc (Hons) Environmental Resource Management (top-up degree)

**For more information
search #science2021
at www.cornwall.ac.uk**

ALUMNI SUCCESS

“During my studies on the BSc (Hons) Environmental Resource Management, I realised that it's the people/society that is in need of more guidance and help than the damaged environments I've found myself researching. We need to change our nature!

Don't doubt the level of influence you can have as an individual. Get out there, educate yourself and help others to do the same. If enough of us do this, we will end up in a world that we feel proud to hand over to our grandchildren.”

Conor Kendrew
STEM Coordinator
Cornwall College

SPORT

STUDY YOUR PASSION

You don't need to be the next Lewis Hamilton, Lionel Messi or Serena Williams to have a career in sport; they have huge teams behind them which include coaches, medical staff, performance advisors, sports administrators and so on.

As long as you have a genuine passion and enthusiasm for sport then you can carve out a fantastic and rewarding career. Our sports courses vary widely from subject specific programmes such as golf and surf science, to more general programmes and they have all been designed with industry experts to ensure you are ready for employment on completion of your programme. You can also gain extra qualifications alongside your full-time study.

Degree programmes available in this area:

- FdA International Golf Management
- FdSc Sport, Health & Fitness
- FdSc Surf Science & Technology
- FdSc Tournament Golf
- BA (Hons) International Business Management (with Professional Golf)
- BSc (Hons) Marine Sports Science

ALUMNI SUCCESS

After completing the Surf Science & Technology Foundation Degree at Newquay, Sarah joined the Bear Grylls Survival Academy as an instructor. It was while she was there that she was asked if she would like to be a presenter on CITV's Bear Grylls Survival School.

"My role alongside Bear was as an outdoor expert and to help the teams with their challenges. Working with Bear was great, he's an extremely generous and humble man who fully supports his team. I learned so much from everyone, they were all so inspiring and knowledgeable."

Sarah Thomson
Instructor
CITV's Bear Grylls Survival School

MAKE A DIFFERENCE

IF YOU LIKE HELPING PEOPLE AND LOVE CONNECTING WITH OTHERS, THIS IS THE CAREER ROUTE FOR YOU.

“If you are passionate about making a difference then a career working within the Children, Schools and Families sector will be extremely rewarding. Contributing to the daily lives of others can be fulfilling, a great privilege and incredibly worthwhile.”

Laetitia Mayne
Curriculum Area Manager
Children, Schools and Families

The children, schools and families sector offers more career opportunities than you might think; with options ranging from family support workers and speech therapists to nursery managers and teachers. So whether you want to help children learn and develop, protect them from harm or keep them healthy our HNC and foundation degrees will provide you with the in-depth skills you need to make a decision about which career path you wish to choose. Our top-up degrees then help you hone those skills and help you focus on which career will suit you best.

Depending on the job role salaries start from approximately £14,000 and can go up to £70,000. As a support worker you could help families who are experiencing challenging situations, provide learning opportunities for young families to develop living skills, provide day to day care for children in residential care, help deaf students in education, or contribute to the quality of early years and childcare setting.

Therapists can help children make sense of difficult experiences through play, or help them with their speech and language.

CAREERS AVAILABLE IN THIS SECTOR

Community education coordinator
Education welfare officer
Learning mentor
Nursery manager
Speech and language therapy assistant
Communication support worker
Health play specialist
Qualification assessor
Early years support worker
Family support worker

Family support programme delivery worker
Family visitor
Children and young people's support worker
Playworker
Health promotion
Play therapist
Further education lecturer
Early years teacher
Primary school teacher
Secondary school teacher

Working in health could see you informing people about health issues or helping children to cope during their time in hospital. As a teacher you could help children of all ages develop and learn, depending on which age group you wish to teach.

The choice of career path is yours and we are here to help you make the right choice for your future.

Degree programmes available in this area:

- HNC Children, Schools & Families
- FdA Children, Schools & Families
- FdA Early Childhood Studies
- BA (Hons) Children, Schools & Families (top-up degree)
- BA (Hons) Education & Curriculum Studies (top-up degree)

If you wish to further your studies and love teaching you may be interested in:

- CertEd and PGCE (incorporating DET)

For more information search #creative2021 at www.cornwall.ac.uk

ALUMNI SUCCESS

"After the BSc (Hons) Education & Curriculum Studies programme, I joined a SCITT programme and completed this alongside my PGCE. I have now completed my NQT Induction year and am fully qualified. The course provided opportunities to intertwine my own independent interests alongside the core modules. Working as a teacher is even more rewarding than I could have imagined, seeing those 'lightbulb' moments is such an amazing experience."

Jock Stevenson
Primary School Teacher
Camelford Primary School

FOR MANY PEOPLE CONSIDERING A CAREER AS A TEACHER, YOU FACE A RANGE OF COMPLEX DECISIONS BEFORE YOU START TO TRAIN. THE AGE RANGE AND SUBJECT AREAS OF WHAT YOU WANT TO TEACH WILL CLEARLY DEFINE THE ROUTE YOU TAKE.

ROUTES INTO TEACHING

You could teach in nurseries, primary schools and secondary schools, or teach specialist subjects to college-aged students or on degree and postgraduate programmes. All of these sectors require different levels and types of qualifications that can become confusing, especially if you are not sure what it is you want to teach.

There are two main routes to get into primary and secondary school teaching. You can either learn through school-led

training, where you will be based in a school and will learn from experienced teachers, or you can study through the university-led training route, where you can gain a degree which will combine academic study with practical classroom experience.

Some universities offer a sandwich year degree route, some offer school placements throughout. Another option if you're not sure you want to teach, is to gain a subject specific degree, then do a one

year Postgraduate Certificate in Education (PGCE) that will provide you with the skills and experience to become a qualified teacher if that's still your career goal.

The School of Education & Professional Development at Cornwall College offers a wide range of training and assessor qualifications, so if you have experience in industry and want to move into education in a specific trade or professional area, we can help you gain a teaching qualification.

We also offer specialist degree-level and postgraduate qualifications:

- CertEd & PGCE (incorporating DET) - for teaching learners 16+.
- BA (Hons) Education & Curriculum Studies (Final Year Level 6) - for those who have experience and prior qualifications but want to gain a full degree while working in the primary sector.

To discuss your options, please get in touch with Dr Mark Delf, head of school via enquiries@cornwall.ac.uk.

We also offer a range of foundation and honours degrees if you are looking to specialise in the early year's educator sector, working with children in early years and community settings. See page 34 for more details.

Funding for teaching

There are numerous loans, grants and bursaries available if you wish to study teaching. Which one is right for you will depend on your circumstances, what level of teaching you wish to pursue and which subject you want to teach. Although this funding is not guaranteed, it's worth checking out what's available. Visit getintoteaching.education.gov.uk for the latest information on which funding option is right for you.

"There is such a wealth of experience in industry that we need to engage in education and training, for the benefit of the next generation. Our programmes help so many experts into the education sector, it's great to see such passion ignited in the educators of tomorrow."

Dr Mark Delf,
Head of School of Education & Professional Development.

Degree programmes available in this area:

- CertEd & PGCE (incorporating DET)
- BA (Hons) Education & Curriculum Studies (top-up degree)

IN ANY EVENT

If you have aspirations of working in **event management** or the **tourism** industry, then our partnership with the world renowned **Eden Project** will inspire you to take your career to the next level. During your studies you will gain world-class industry experience while learning from the experts.

EVENT MANAGEMENT FdSc

The Eden Project is always a hive of activity so if you would love a career in event planning then our Event Management Foundation Degree will give you the inside track on how to organise various events including conferences, weddings, gigs and performances, which all take place amongst Eden's stunning backdrop. This programme ensures that your knowledge is relevant and meets industry standards. On completion you will be equipped with professional leadership and business management skills, as well as specialist knowledge of the industry, and could go on to a career in event management, marketing and fundraising, festival organisation, hotel events management, wedding consultancy and more.

Degree programmes available in this area:

- FdSc Event Management
- FdSc Ecotourism

For more information search #tourism2021 at www.cornwall.ac.uk

ECOTOURISM FdSc

Ecotourism helps to reduce the impact that tourists have on naturally beautiful environments and in doing so unites sustainable travel and conservation with communities. Those employed in the ecotourism industry work with local communities to educate and encourage tourists to protect the local environment and its resources, respect local customs and traditions, and support local businesses.

This programme is primarily based at Cornwall College Newquay, with some modules run at the Eden Project. With an environmentally friendly ethos at its heart, Cornwall College Newquay offers courses in zoological conservation, wildlife education and marine conservation, so you will feel completely at home with the other students.

On completion of this programme you will have gained the scientific know-how and entrepreneurial abilities to consider starting your own small businesses in Cornwall and beyond.

"If it wasn't for being able to study the FdA Event Management whilst working in Cornwall, I would never have gained a First Class BA (Hons) Leisure Marketing degree. The FdA gave me the opportunity and the motivation to get a degree, something I'd never previously considered or believed I'd achieve. Without it, and after 10 years in the public sector, it's unlikely I would have started a career in agency PR. Six months after gaining my degree I secured a job with Wild West Communications, a leading South West public relations, social media and communications agency, where I was an account manager and I am now the head of sales & marketing at luxury holiday cottage company Cornish Gems."

Phillipa Snell
Head of Marketing & Sales
Cornish Gems

Falmouth Marine School

Based around a thriving harbour Falmouth is gateway to the beautiful Fal River which runs through an Area of Outstanding Natural Beauty. Our marine students also get the chance to explore the world's third largest natural deep water harbour.

Falmouth has been listed as top in the South West in the prestigious Sunday Times Best Places to Live Guide, so even if you don't choose to study at Falmouth, you may want to live in this growing university town.

Cornwall College Newquay

Cornwall College Newquay is a modern, small and friendly campus located in the heart of the bright and bustling town of Newquay. Specialising in animal behaviour, zoology, marine conservation and surf science studies, the campus has gained a reputation for being environmentally friendly and offering superb individual support for its undergraduates.

In addition to The Centre for Applied Zoology site on Wildflower Lane, we extend beyond the classroom to include Newquay Zoo and Blue Reef Aquarium. These close partnerships give you the chance to gain valuable work experience and practical knowledge.

STUDYING A DEGREE AT A COLLEGE HAS ITS BENEFITS...

Cornwall College Camborne

Situated in the heart of the historic world heritage mining industry, the campus is close to major tourist attraction Heartlands. There's a host of great on-site facilities including a gym, all weather sports pitch and award-winning restaurant. In the heart of west Cornwall you are only a short journey from both north and south coasts, great beaches and wonderful Cornish nightlife.

Cornwall College St Austell

Our St Austell campus has breathtaking views over St Austell bay, hosts excellent learning resources and close links with many businesses to provide you with great work experience opportunities during your studies.

Our students also get the chance to go on a volunteer Kenya programme, where for two weeks you work in Rongai, helping to provide better education facilities for some of Kenya's most disadvantaged children and deprived communities.

Eden Project

Eden's world famous architecture, gardens, exhibitions, and the Eden sessions, coupled with Eden's specialist plant collections, growing facilities, dedicated laboratory and design studio, together provide a world-class study platform.

Bickton College

Located only 20 minutes from the heart of Exeter, Bickton College is set in acres of outstanding natural beauty in East Devon. The Georgian manor house provides a breathtaking centrepiece to a land-based college with a difference. Here you can live and study in an exceptionally beautiful space, with dedicated accommodation, gym and sports facilities, restaurant and bar and exclusive undergraduate study spaces. There's also an active students' union that organises a range of trips and fun events for those students living on campus.

A short journey away is the vibrant university city of Exeter, home to some fantastic restaurants, shopping, bars, clubs, arts and culture. You're only two hours from London or 20 minutes from the nearest beach.

Duchy College Stoke Climsland

On the border between Devon and Cornwall, this extensive rural campus is home to almost 2,000 students. Only 20 minutes away from Plymouth, you can access the facilities of the University of Plymouth and its students' union if your degree with us is awarded by them.

We offer a range of boarding types in our residences on campus, and also hold a list of local landlords if you wish to live off campus. There's a range of activities, trips and fund-raising that our students participate in throughout the year that you can be involved in as much as you want.

Duchy College Rosewarne

Only five minutes from the historic mining town of Camborne, you are well placed to access some of the most amazing beaches and countryside the UK has to offer. A small campus with fewer than 1,000 learners, means you get an amazing student experience, access to resources and facilities that support the delivery of our very specialist degrees.

CAMPUS LIFE

Each campus offers something different and has its own specialisms, now it's time to find yours.

Duchy College Stoke Climsland

Did you know?

We also run courses at the UKSA in the Isle of Wight and the East Sussex National Golf Resort.

A FLEXIBLE, UNIQUE WAY TO STUDY

Foundation degrees were developed to bring higher education closer to business and industry, with a fusion of academic and vocational learning designed to make you more employable.

2 year foundation degree + top-up degree = honours degree

Completing a two year foundation degree offers you the flexibility to study for a final year of a relevant Level 6 degree.

UCAS tariff points Convert your grades into UCAS tariff points by using the table. Once you have worked out your UCAS points you can start searching through the 80+ programmes we have to offer, to find the right one for you.
