

Engineering Installation and Commissioning NVQ Diploma Level 2 EAL

This course is suitable for anyone carrying out a range of engineering maintenance activities in the workplace but with no formal qualification. This course can also enable progression onto a Level 3 qualification or an apprenticeship.

Candidates would need to be working in a suitable environment with regular regular access to engineering maintenance tasks. The assessment is through a portfolio of evidence with regular assessor visits to support and guide the candidate through the process of gathering appropriate evidence.
