

Architectural Joinery Apprenticeship Standard Level 2

Apprenticeship

The purpose of this course is working with wood-based materials and associated products to create and install building components. This typically involves shaping and cutting materials, installing finished. All work needs to be carried out safely, using the appropriate tools and to the quality specified.

An Architectural Joiner will create building components by setting out, marking out and manufacturing basic architectural products, including doors, windows, straight staircases and associated ironmongery.

In their daily work, an employee interacts with other construction roles such as bricklayers, plasterers and plumbers, supervisors, site management, architects, designers, contractors and customers.

You will be responsible for using machinery and tools under supervision to create structures or components from the designs, plans and specifications of architects and designers that meet the clients expectations. As an architectural joiner, they could include doors, windows and stairs, including ironmongery.
