

BSc (Hons) Applied Zoology (Top up) degree

University

- Highly flexible content that allows you to tailor your degree around your own interests within the field of Zoology
- Small boutique-style University Centre campus
- Direct (free) access to Newquay Zoo (part of the Wild Planet Trust) located adjacent to our Newquay University Centre campus, as well as Blue Reef Aquarium located a short walk away.
- Located on the edge of a Marine Conservation Zone, we make full use of the stunning marine and terrestrial environments on our doorstep for trips and field studies.
- Opportunities to join international field trips to, for example, Honduras and Borneo, to gain field experience and network with academics and field staff from all over the world (additional fee applicable).

Understanding of our deep-rooted connexions and interactions with animals and the environment is essential to tackling the challenges faced by modern society. The BSc (Hons) Applied Zoology prepares students to take on those challenges, equipping students with the skills needed across a broad range of career paths. Our graduates go on to be successful within the conservation and animal care sector as well as postgraduate study.

This course provides students with a relevant foundation degree or HND to 'top-up' to gain a full BSc (Hons) bachelor's degree. The programme has been designed to run as either a one-year full-time or two-year part-time programme.

The course content allows students to develop their own academic profile through optional modules and research project choices. This gives students a high level of autonomy and flexibility, allowing them to tailor the programme to their own interests and expected career path. This flexible approach makes this course ideal for students coming from a wide range of backgrounds within the general field of zoology, animal management, ecology and conservation.

Modules cover a range of subjects including wildlife conservation, animal behaviour, impacts of disease and science communication.

The programme has been designed to develop skills and knowledge which are highly relevant to any future employment path, equipping graduates with knowledge relevant to environmental sustainability of society and business. With the increasing environmental challenges faced
