

Cert HE Zoology with Ecology and Conservation

University

This Cert HE course is designed to cater for students who have 48 - 63 UCAS points or have Level 3 qualifications in a non-scientific subject set. On successful completion of the Cert HE, the student will progress directly into the second year of the FdSc programme. The Green revolution has begun, now more than ever we are realising the danger our planet is in. This course will set you on a journey towards aiding its recovery..

You will be based in a fantastic rural campus in the heart of Newquay, with a small, family feel, within a short drive of sandy beaches, dynamic dunes, wild moorland and ancient woodland. The staff are research active and bring that expertise to the class.

Finally, we have strong links with local conservation organisations to develop your work-related experience, which is a very strong thread through the programme.
