

# Groundworker Apprenticeship

## Apprenticeship

Groundworkers are the first trade onto a construction and civil engineering site and work closely with supervisors and engineers in interpreting design specifications to prepare the site ready for the structural building works to take place.

As a Groundworker you will work throughout the construction phase, working with all on-site construction trades, such as bricklayers and plant operatives, up to and including the final completion activities of the project.

A Groundworker's skills and knowledge includes the setting out and preparing of sub-surfaces ready for the structural work to begin, installing drainage systems, concreting, constructing roads and pathways and carrying out the finished hard landscaping.
