

Level 3 Award in the Design, Installation and Commissioning of Small Electrical Energy Storage Systems

Adult

Employer Training

 CORNWALL
COLLEGE

As renewable energy sources like solar and wind become more prevalent, the demand for efficient energy storage systems is increasing. This qualification enables electricians to offer new services and solutions to clients looking to optimise their energy usage and reduce grid dependency. Additionally, possessing specialized skills in energy storage can open up new career opportunities and increase earning potential in a competitive market.

Overall, the Level 3 course equips electricians with the technical know-how and industry-recognized credentials to excel in the growing field of energy storage systems, ensuring they remain relevant and valuable professionals in the electrical industry.
